by TREASURY

Cast from salvaged molds that were on the verge of extinction -their previous owner wanted to melt them for the raw materials-LITHICS is a line of newly minted rings rooted in past disciplines.

Treasury has reproduced these original, architecturally-founded rings in sterling silver, each one hand-finished in New York. With designs from the 1920s-50s that hark back to the epic elements in nature, including cliffs, mountains, coral reefs and thorny vegetation,

The LITHICS rings are a testament to the true value of beauty: timelessness. We're so happy to be able to offer these stunning, organic pieces that could have been lost forever.
